Experience

Span d.d Zagreb, Croatia
Junior Developer *January 2026 – Current*
- Developed full-stack applications using ASP.NET Core, Angular, and Blazor, integrating solution components with Azure services and resources.
- Executed end-to-end deployments across Azure cloud and on-premises environments, maintaining and improving Infrastructure as Code using Bicep and Helm charts.
- Created and maintained Azure DevOps CI/CD pipelines to automate build, test, and deployment workflows.
- Configured and managed Red Hat OpenShift and Argo CD to support on-premises deployments, container orchestration, and GitOps workflows.

CROZ d.o.o Zagreb, Croatia
DevOps Engineer Internship *July 2025 – September 2025*
- Utilized OpenShift, Kubernetes, Docker, and DevOps/GitOps tools such as Prometheus, Argo CD, Ceph Storage, NFS, Red Hat ODF, Portworx, Veeam Kasten, KEDA, and OS Virtualization
- Deployed and maintained bare-metal servers, with a focus on automating application deployment pipelines
- Completed project tasks aimed at improving server performance, maintaining security with external backups and custom user privileges, performing horizontal and vertical scaling based on resource usage and metrics to reduce costs

Education

Faculty of Electrical Engineering and Computing [FER] Zagreb, Croatia
Bachelor's in Computer Science *2023 – 2026*
Master's in Computer Science *EST. 2026 – 2028*

Projects

RoadmapAI (Bachelor's thesis) [Link] | *ASP.NET Core, Angular, FastAPI, Azure, Google Gemini*
- Designed and developed an AI-powered personalized learning platform that transforms course materials into structured learning roadmaps with interactive lessons, exams, and personalized feedback.
- Implemented end-to-end course generation, learning progress tracking, and adaptive review workflows based on student performance.
- Built secure authentication, multi-format course material uploads, and on-demand AI content generation to support personalized learning experiences.

Easyvim [Link] | *Lua, Neovim API*
- Developed a Neovim distribution as a fully functional IDE for fast and productive programming
- Implemented on-demand loading using Lua scripting, resulting in significantly faster startup and runtime performance compared to most commercial IDEs, without compromising functionality

Dobby (team project) [Link] | *Next.js, React, Supabase, shadcn/ui, PostgreSQL, FastAPI, Vercel*
- Developing a social platform for personalized movie recommendations powered by an AI microservice.

Vimerate [Link] | *C++, Win32 API*
- Developed an extremely fast Vim-style grid launcher for Windows, featuring a GUI for customizing colors, hotkey combinations, grid characters, and other settings.

Tinfer (team project) [Link] | *Angular, Spring Boot, Supabase, Hibernate ORM, Render*
- Developing an application to help college students connect for friendships, relationships and business opportunities

Technical Skills

DevOps: Linux, Azure, Azure DevOps, Bicep, OpenShift, Kubernetes, Docker, Helm Charts, Bash

Development: ASP.NET Core, Next.js, React, Angular, Blazor, Python, PostgreSQL

Core Skills: Git, GitHub, Data Structures & Algorithms, LeetCode, Problem Solving, OOP, Math, Logic, Cloud Computing

Extracurriculars

Faculty of Electrical Engineering and Computing Zagreb, Croatia
Vice President of the Varsity Powerlifting Team "Nabildani Mozak" *October 2024 – October 2025*
- Coached students in powerlifting and prepared them for competitions.
